

education

master | control engineering

tsinghua university | 2015-2018

- research: deep learning optimization, human pose estimation, object detection, face detection, face alignment, face recognition.
- advisor: Lei Zhang

bachelor | instrument and measurement science

kunming university of science and technology | 2008-2012

- concentration in control theory

teaching

tsinghua | student instructor

april 2018 - july 2018

Big Data class in Tsinghua University, covering the following topics

- Developed deep learning experiments for the class, including optimization methods, GAN models and object detection algorithms.
- Designed quizzes, exams, and homework for the class.

skills

programming languages

python • c++

machine learning

algorithms

- Object Detection
- Human Pose Estimation
- Facial Detection and Recognition
- Deep Learning Optimization

frameworks

pytorch • tensorflow • Caffe • keras • MXNet • ONNX • TensorRT • GluonCV
deep learning deployment
Docker • Cloud • Kubernetes • Jetson Xavier • Jetson Nano

general

languages

english • chinese

software

LaTeX • photoshop

os

linux • mac • windows

experience

aifi inc. | senior research engineer (computer vision)

june 2018 *junior* → feb 2020 *senior* → present

- Ownership computer vision detection algorithms and services in the RGB-only auto-checkout solution (Similar to Amazon Go with only RGB cameras deployed).
- Prototype computer vision algorithms in RGB-only auto-checkout solution (includes customer-tracking and product-tracking).
- Developed the customer-detection algorithm based on MASK-RCNN and Openpose in the customer-tracking system.
- Developed the product-detection algorithm based on CenterNet in the product-tracking system.

the hong kong polytechnic university, hongkong | research assistant

october 2016 - april 2018

- Developed PID optimizer to accelerate the training of CNNs.
- Developed the PolyU-Face system (face detection, alignment, recognition).

taiyuan iron and steel corporation, china | control technician

july 2012 - september 2014

- Focused on tuning the parameters of PID controller in the steel milling machine.

publications

published/accepted

- Wangpeng An, et al., 2018: "A PID Controller Approach for Stochastic Optimization of Deep Networks" IEEE Conference on Computer Vision and Pattern Recognition *CVPR Spotlight*
- Wangpeng An, et al., 2017: "Exponential Decay Sine Wave Learning Rate for Fast Deep Neural Network Training" *VCIP oral*
